

QuickBite: Crisis Recovery Analysis

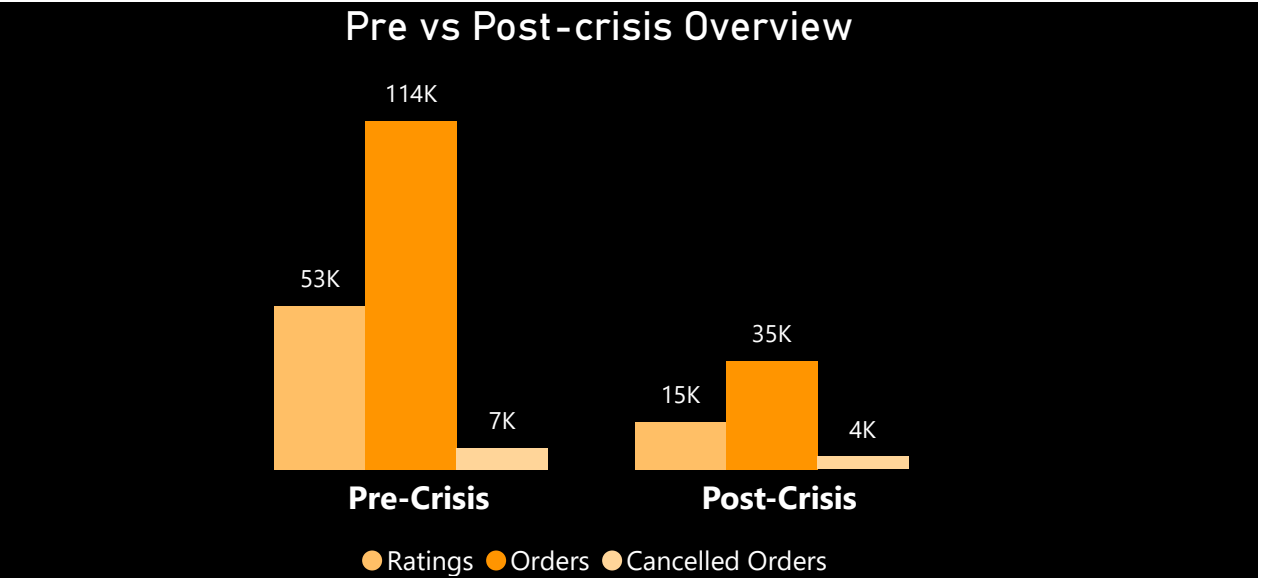

June 2025 crisis caused a 61% drop in orders driven by service failure and loss of customer trust

			Order Cancellation Rate		Average Delivery Time	
0.69	0.44	25.78M	48.31	96.05	39	60
Orders Decline %	Rating decline %	Revenue loss	Pre-crisis	Crisis	Pre-crisis	Crisis

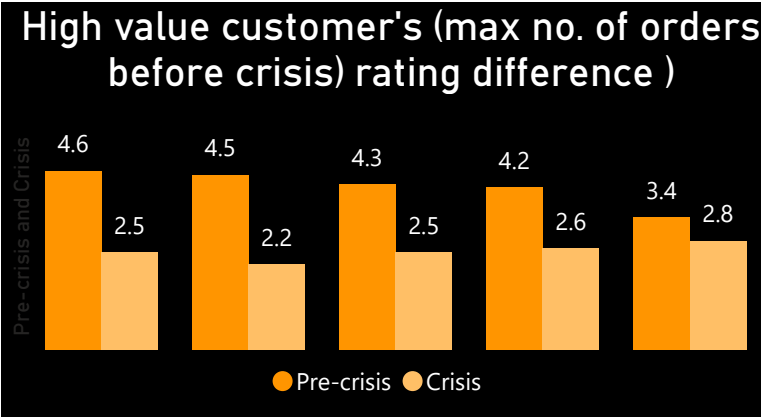

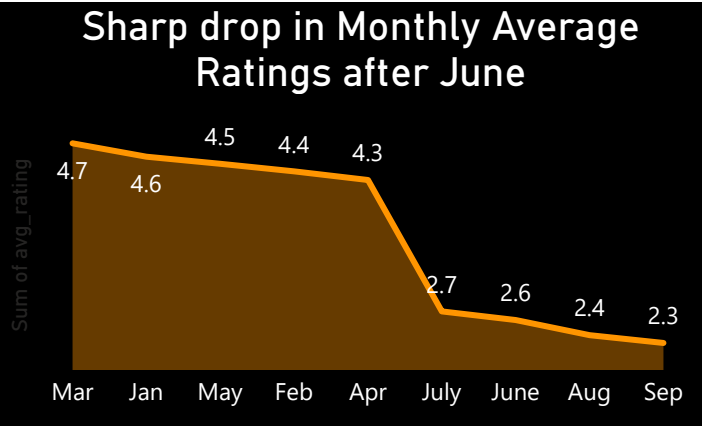

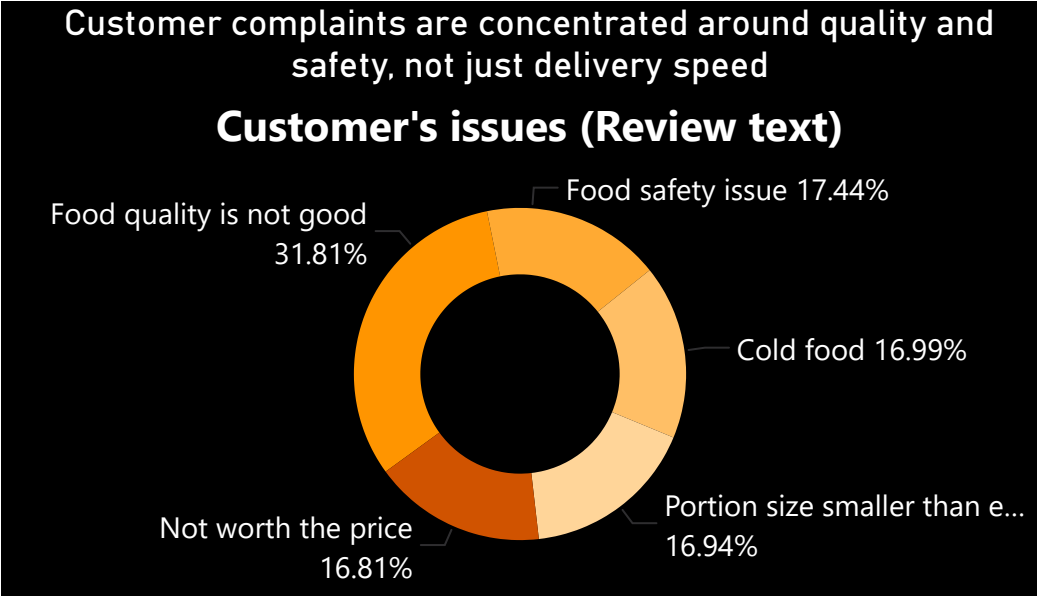

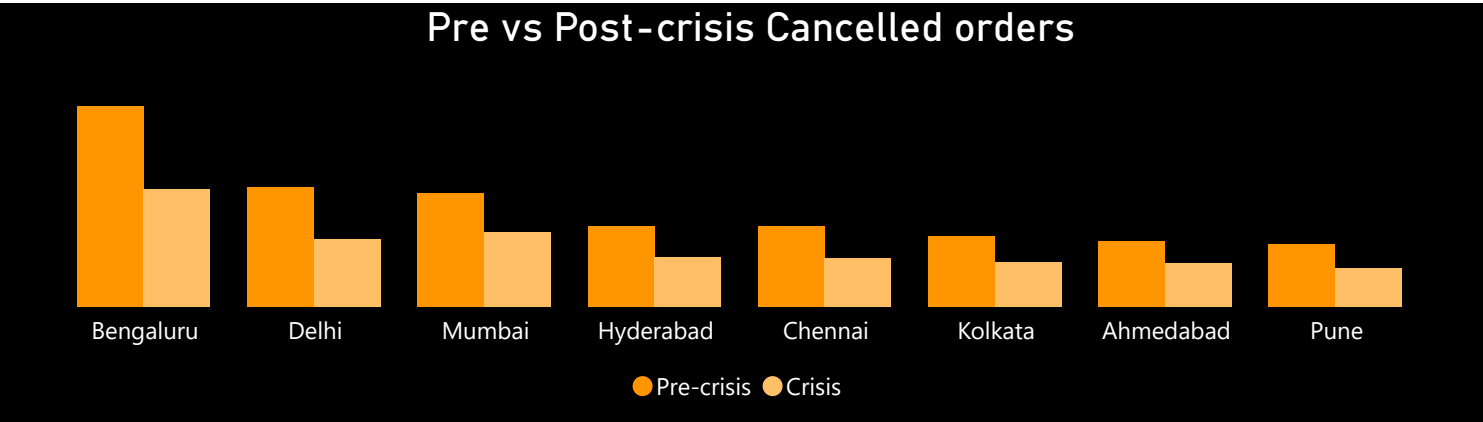

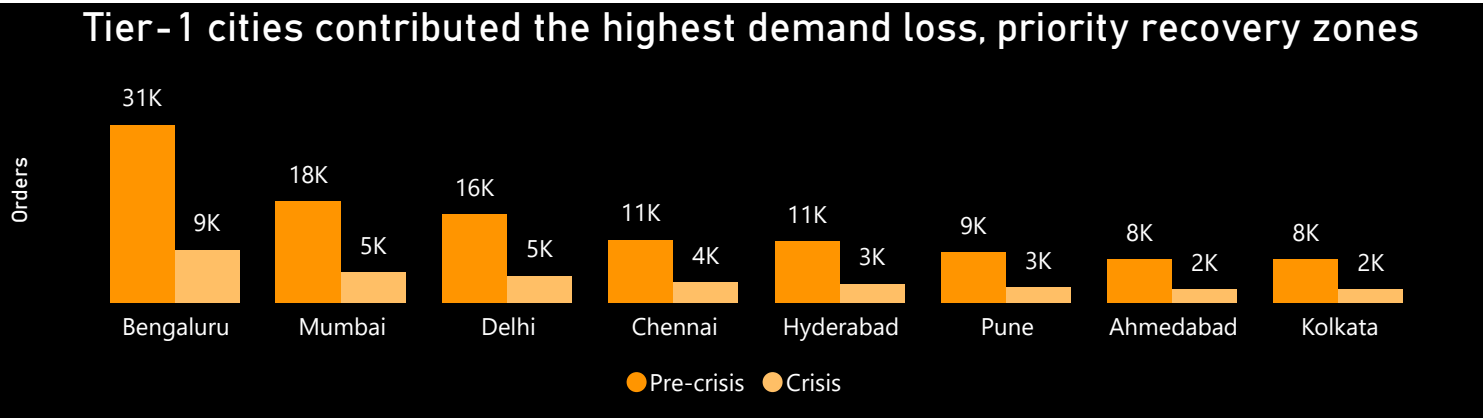

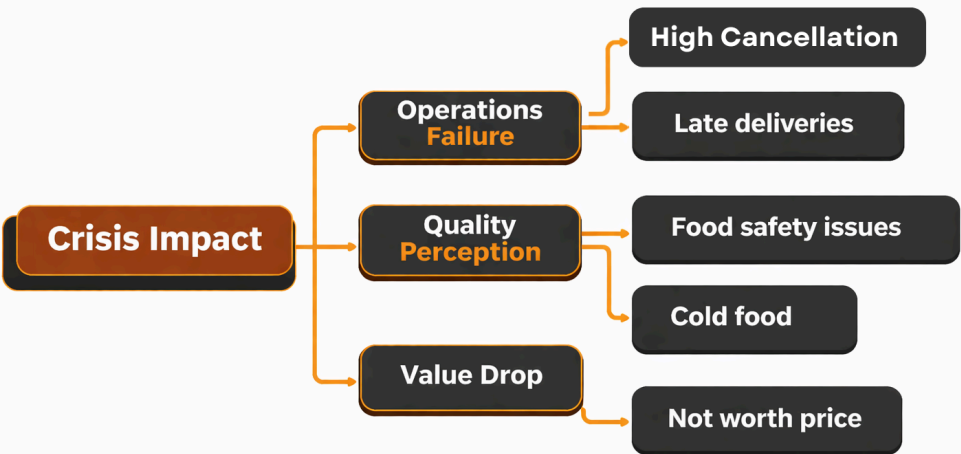

Sharp structural break in June, demand did not recover in following months

All key experience metrics (ratings, orders, cancelled orders) deteriorated simultaneously, indicating systemic failure

This is not a seasonal drop Multiple core metrics failed together, signaling operational breakdown and trust erosion

Root Cause: Deep Dive

The crisis is driven by a combination of operational delays and perceived decline in food quality, leading to trust breakdown

Recovery Strategy & Impact

Recovery depends on restoring trust first, then reactivating demand through targeted incentives

Strategy Framework

Trust Recovery

- Food safety audits
- Quality assurance

Operations Fix

- Reduce delivery time
- Lower cancellations

Targeted Cashback

- Focus on high-value users

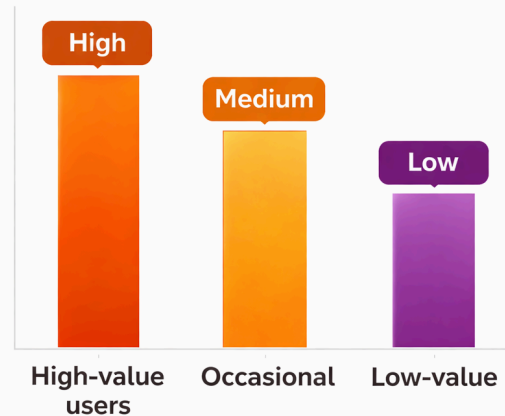

Partnerships

- Banks, restaurants

Expected Customer Recovery:

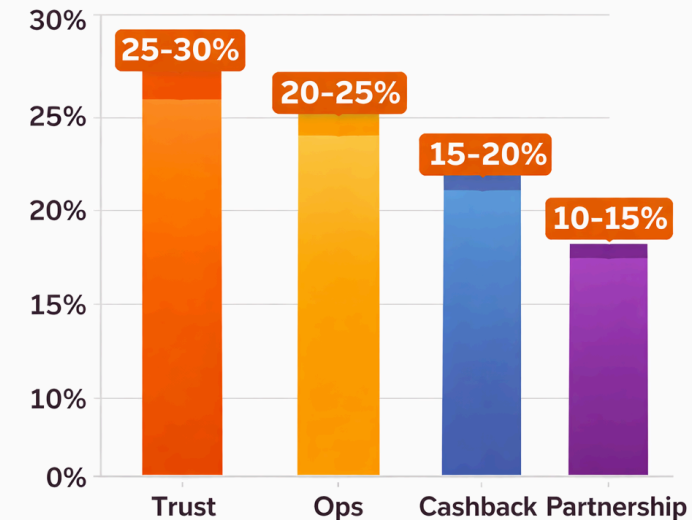

50% – 65%

Recovery by User Value

Recovery should prioritize high-value customers for maximum ROI

Recovery Potential

zomato

SWIGGY

Competitors like Swiggy & Zomato successfully used cashbacks, partnerships, and safety initiatives to rebuild trust and demand

Without fixing delivery reliability and food quality, cashback strategies will not sustain recovery
